NOTES TO TABLE 2

1. K1–7 (Kohoutek 1963).
2. Nebula appears as a disk with bright stripes.
3. Listed as probable supernova remnant by Vorontsov-Velyaminov (1961).
4. Appears as overlapping rings and filaments.
5. K1–11 (Kohoutek 1963).
6. Appears as a small parallelogram surrounded by a large ring.
7. K1–13 (Kohoutek 1963).
8. K1–1 (Kohoutek 1962*b*).
9. Appears as a disk with superposed filaments.
10. Appears as a disk with extended filaments.
11. IC 972.
12. K1–3 (Kohoutek 1962*b*).
13. Appears as a rectangle with bright edges.
14. Appears as a disk with several sections of different brightness and extended filaments.
15. Appears as a ring with an extended filament.
16. Appears as an ellipse with several sections of different brightness.
17. Appears as a ring with extended filaments and luminous areas.
18. IC 1454.
19. The center of the extended radio source CTB-1 (Wilson and Bolton 1960) is 0°.4 east of the nebula; it may be a supernova remnant.
